Uninstalling Bazaa	10
From the Start menu	10
From Control Panel	12

## Overview

Bazaa is an application which links you directly with relevant people – making it the world's first secure, private people2people internet. It's a peer-to-peer decentralized search system that directly links people with other people of relevance.

This document lustrates the Installation steps for Bazaa on Windows operating system.

## Installing Bazaa

### Prerequisite

If there is a previous instance or residual files of Bazaa installation in the system, refer to the sections below before continuing with the **Installation Steps** section.

#### Clean Installation

To install the latest version of Bazaa without retaining anything related to the previous installation, check if there is any previous installation present in the system. If such an installation exists, uninstall that instance by going through the **Uninstalling Bazaa** section. After uninstalling, perform the action mentioned in the **Post Uninstallation Steps** section as well.

#### Fresh Installation

To install the latest version of Bazaa retaining the database, system settings and user information of the previous installation, go ahead with the **Installation Steps** section below and perform the Overwrite action mentioned in the Step 6c.

### Installation Steps

Bazaa installation wizard enables an easy installation of the application in the Windows operating system.

Perform the following actions to install Bazaa Search:

- 1) Follow the URL <u>http://www.bazaanetworks.com/index.php/downloads</u> and click the Windows option to download the installer package (.exe).
- 2) Double-click the executable file from the downloaded location. The Bazaa installation wizard gets launched.

3) Click the **Next** button in the Bazaa Welcome panel.

**NOTE:** In case the following wizard appears due t the existence of a previous installation, choose one of the following options accordingly.

Select one of the options below as required and click Next:

- a. Modify: To add or remove any specific component in the installation. The modify window will appear with all the features available in that installation with the Installed features selected and the rest unchecked. Select or uncheck any feature to install or remove the particular feature respectively.
- b. Repair: To re-copy the files which are required by the features those are installed. It will not copy the files of those features which are not installed. This will be helpful in case the installation did not happen properly of if any component gets deleted by mistake.
- c. Remove: To remove all the features which are installed and completely uninstall the application.

It is recommended to use **Remove** option only to completely remove the installation.

4) Select the option to accept the license agreement and click **Next**.

**NOTE:** To review/change a value entered during the installation, click the **Back** button and to quit the installation at any point, click the **Cancel** button.
